

EVACUATION PLAN | Gas up your vehicle and plan for pets, transportation routes and destinations. Return home only with approval of local authorities.

PERSONAL DOCUMENTS | Locate wills, passports and ID insurance cards and have a record of your immunizations handy should you need a tetanus shot or other hospital care.

PROTECT FINANCIAL DOCUMENTS
Safeguard important documents in a bank safety deposit box, computer storage devices, water/fireproof storage containers or an offsite records storage service.

SAFEGUARD ELECTRICAL SYSTEMS | Protect electrical appliances and systems and avoid data loss. A generator, home battery backup system or an uninterrupted power supply (UPS) is the best defense against sudden shutdowns or surges.

ASSEMBLE AN EMERGENCY KIT | Your emergency kit should include first aid supplies, a flashlight, extra batteries, non-perishable food and water for at least three days, towels and a supply of any necessary medications.

CHECK INSURANCE COVERAGE
Renters should be sure to insure their homes against flooding; most standard coverage does not automatically include flood protection.

AFTER THE STORM | If evacuated, wait for a go-ahead from local authorities. If you sheltered in place, make sure the storm has completely passed before going out. Report downed power lines and stay away from them. Use clean water and food.

BE READY FOR STORM SEASON.

Making safety a priority.
